D-Type Coalescer Element

For separation of water and solids from aviation fuels according to TL 4330-0001 (Part 1 & 2), Mil-F-8901E and AM+M 537 B.

Filter water separators are fitted with coalescer and separator elements and used on aircraft refuelling vehicles, hydrant dispensers and other mobile fuelling equipment. They are also used in fixed fuelling installations and tank farms. FAUDI Aviation coalescers are commonly used in other branches of industry such as refineries, petrochemical plants and marine applications where high efficiency filtration and separation is required.
