Introduction

These certified strobes have been designed for use in potentially explosive atmospheres and harsh environmental conditions. The glass reinforced polyester enclosure is suitable for use onshore and offshore, where light weight combined with a high level of corrosion is required.

The strobe housing is manufactured completely from a U.V. stable, glass reinforced polyester. Stainless steel screws and mounting bracket are incorporated ensuring a totally corrosion free product.

Units can be painted to customer specification and supplied with identification labels.

European, Chinese and other worldwide approvals are available, refer to main section of catalogue.
